packing-house for hogs on Delaware street, next to Hathaway's printing office, and taken both cellars and a large upper floor for the business. They are packing only 100 a day now, and proceeding more cautiously than last season. When the way is clear they will double the amount, and rush their business in all of its departments. The kind of hogs which they are carving and packing are as fat and compactly built as could be . esired. Within the last few years a great change has come over the Kansas stock in this re spect, and our bogs are now unexcelled by all others. The difference is a vast one to both the tarmers and the packers. Still further turther improvements can be made, for the art of breeding is never at a stand-still but always progressing.

The Bridge..
A letter from Mr. Boomer, the Chicago bridge suilder, says that on the 22d the balance the material to complete the first span the Kansas and Missouri Bridge was beng lor led and would be forwarded at once, and to ta portion of the other spans was ready and would also be sent forward. The castin - or the entire work were nearly finished and by the 15th of December all of them would be shipped from the factory. The present delay had been caused by a mistake at the rolling mills in the manufacture of a part of the bridge. The whole factory

was now being strained to finish the structure, which would be done immediately.

Cold.

The thermometer on Sunday was 30° below zero, at Helena, Montana Ter., but 20° above the same point here. It was cold enough, in Leavenworth, but at this early season of the year for Montana it was foodial. W. the year for Montana it was fearful. We in any return made to this office, claimed to have, either any capital stock or guarantee capital, but always claimed to be purely mu-tual.
